## EVAPORATIVE BLADELESS AIR COOLER WITH CENTRIFUGAL FAN

Large air flow with possibility of automatic 360° rotation of the diffuser for multi-directional flow. Panel with touch controls to choose between 6 different fixed speeds and 3 different ventilation programs. Equipped two 6.5 litre communicating tanks with top loading. The timer is programmable up to 12 hours, with automatic switch-off. Thanks to the two ice packs included in the package, it is possible to increase the cooling effect. No piping is required for operation and the castors allow it to be easily transported and positioned anywhere.

**To significantly increase the intensity of fresh air, it is advisable to use in the water tank both the frozen ice boxes (contained in the package) and ice cubes.**
